

Year 4 Mathematics Parents Information Support Booklet

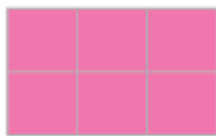

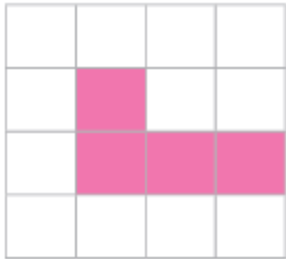

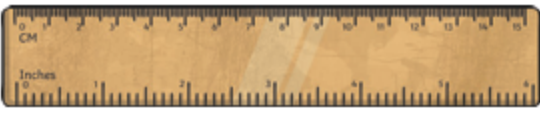

Block 2– Addition and Subtraction

Check with your class teacher what is currently being taught.

Addition and Subtraction		Knowledge Organiser	
Key Vocabulary	Addition and Subtraction Methods		
Add	Add 4-digit numbers	Subtract 4-digit numbers	
Total	No exchange	No exchange	
Plus	$\begin{array}{r} 5162 \\ +3427 \\ \hline 8589 \end{array}$	$\begin{array}{r} 5789 \\ -3421 \\ \hline 2368 \end{array}$	
Sum	Starting with the ones, add each column in turn.	Starting with the ones, subtract each column in turn.	
More			
Altogether	One exchange	One exchange	
Difference	$\begin{array}{r} 5162 \\ +3497 \\ \hline 8659 \\ 1 \end{array}$	$\begin{array}{r} 61 \\ 5749 \\ -3471 \\ \hline 2278 \end{array}$	
Subtract	Starting with the ones, add each column in turn. When adding 6 tens + 9 tens = 15 tens = 1 hundred + 5 tens	Starting with the ones, subtract each column in turn. When subtracting 4 tens - 7 tens, exchange 1 hundred to make:	
Less	Place 1 hundred under the hundreds answer and 5 tens in the answer.	14 tens - 7 tens = 7 tens	
Minus			
Take away	Multiple exchanges	Multiple exchanges	
Mentally, Orally	$\begin{array}{r} 5864 \\ +3497 \\ \hline 9361 \\ 111 \end{array}$	$\begin{array}{r} 6131 \\ 5742 \\ -3476 \\ \hline 2266 \end{array}$	
Column Addition	Starting with the ones, add each column in turn. Exchange tens, hundreds and/ or thousands as required.	Starting with the ones, subtract each column in turn. Exchange tens, hundreds and/ or thousands as required.	
Column Subtraction			
Exchange			
Estimate			
Inverse operation			
Solve problems	Efficient subtraction		
Number facts	$\text{Calculate } 6000 - 3617 = 2383$		

Addition and Subtraction		Knowledge Organiser									
Add and Subtract 1s, 10s, 100s, 1000s		Round to Estimate									
<p>Here is the number 3124</p> <p>Add 2 thousands = 5124 Add 5 hundreds = 5624 Subtract 2 tens = 5604 Add 5 ones = 5609</p> <p>Here is the number 6708</p> <table border="1"> <thead> <tr> <th>Thousands</th> <th>Hundreds</th> <th>Tens</th> <th>Ones</th> </tr> </thead> <tbody> <tr> <td>6</td> <td>7</td> <td>0</td> <td>8</td> </tr> </tbody> </table> <p>Add 3 thousands = 9708 Subtract 4 hundreds = 9308 Add 5 tens = 9358 Subtract 7 ones = 9351</p> <p>Crossing ones, tens or hundreds</p> <p>5392 + 4 tens = 5432 crossing tens 5126 - 600 = 4526 crossing hundreds</p> <p>When crossing ones, tens or hundreds, more than one digit will change.</p>		Thousands	Hundreds	Tens	Ones	6	7	0	8	<p>1635 + 386 = 2021 Round to the nearest ten 1640 + 390 = 2030 Round to the nearest hundred 1600 + 400 = 2000</p> <p>Both give a reasonable estimate, but rounding the nearest ten is more accurate.</p> <p>9362 - 5729 = 3622 Round to the nearest hundred 9400 - 5700 = 3700 Round to the nearest thousand 9000 - 6000 = 3000</p> <p>Rounding to the nearest hundred is much more accurate in this case.</p>	
Thousands	Hundreds	Tens	Ones								
6	7	0	8								
Checking Strategies											
<p>Using Inverse</p> <p>3476 - 744 = 2732 can be checked using 2732 + 744 = 3476</p> <p>This part whole shows the inverse calculations using these three numbers.</p> <table border="1"> <tbody> <tr> <td>1549 + 2688 = 4237</td> <td>2688 + 1549 = 4237</td> </tr> <tr> <td>4237 - 1549 = 2688</td> <td>4237 - 2688 = 1549</td> </tr> </tbody> </table>		1549 + 2688 = 4237	2688 + 1549 = 4237	4237 - 1549 = 2688	4237 - 2688 = 1549	<p>Adding in a different order</p> <p>420 + 372 + 280 =</p> <p>Change to</p> <p>420 + 280 + 372 =</p> <p>As 420 + 280 = 700 (because 42 + 28 = 70)</p> <p>420 + 280 + 372 = 700 + 372 = 1072</p>					
1549 + 2688 = 4237	2688 + 1549 = 4237										
4237 - 1549 = 2688	4237 - 2688 = 1549										

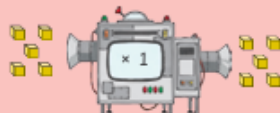

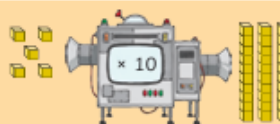

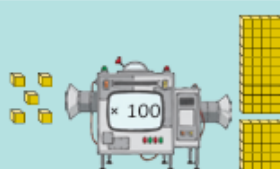

Block 3– Area

Area and Perimeter		Knowledge Organiser	
Keywords	Area and Perimeter	Measuring Area	
area	Area is the amount of space inside a 2D shape.	We can count squares to find the area of a rectilinear shape.	
perimeter	Perimeter is the total distance around the outside of a 2D shape.	 Area = 1 square  Area = 6 squares  Area = 4 squares	
centimetres			
metres			
squares			
distance			
millimetres			Units of Measure for Perimeter
kilometres		km 1 kilometre = 1000 metres m 1 metre = 100 centimetres cm 1 centimetre = 10 millimetres mm	A rectilinear figure is a 2D shape whose sides all meet at right angles (90°).
length			
width			
rectilinear			
right angle			
			

Vocabulary and home learning

- Practise drawing shapes on squared paper and finding the area (coverage or space inside the shape. Encourage reliable counting and multiplying if the shapes are rectilinear.
- Use the BBC and Purple Mash area and perimeter online challenges .
- Link area to multiplication.
- Draw a flat plan of a zoo and draw rectilinear shapes for animal cages. Can you work out the area and perimeter of each cage?
- Remember that area is a squared measurement, because you are measuring 2 dimensions; length x width.

Block 4– Multiplication and Division A

Multiplication and Division										Knowledge Organiser																																				
Key Vocabulary	Multiplication and Division Facts										Use Place Value to Multiply and Divide Mentally																																			
multiply	x	1	2	3	4	5	6	7	8	9	10	11	12	 $5 \times 1 = 5$ $5 \div 1 = 5$

	2	1	7	2																																										
	1	1																																												

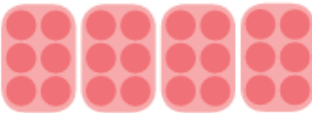

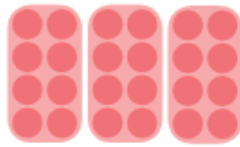

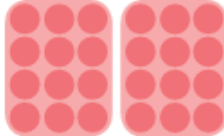

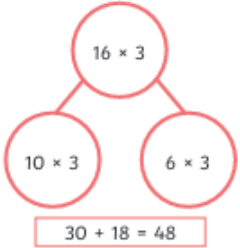

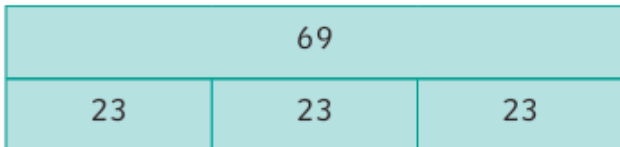

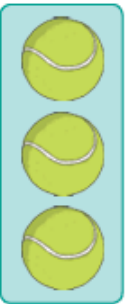

Vocabulary and home learning

Make a poster that shows the vocabulary of multiplication and division.

Practise using known facts and place value to multiply and divide bigger numbers. I know $4 \times 3 = 12$ so I know 40×3 is 120.

Practise column multiplication method using expanded and compact method (see above)

Spring Block 1 Multiplication and Division B

Multiplication and Division		Knowledge Organiser						
Mental Calculations for Solving Problems		Integer Scaling Problems						
<div style="background-color: #e91e63; color: white; padding: 2px; margin-bottom: 5px;">$(2 \times 3) \times 4 = 24$</div> 	<div style="background-color: #e91e63; color: white; padding: 2px; margin-bottom: 5px;">$(2 \times 4) \times 3 = 24$</div> 	<div style="background-color: #ffc107; padding: 2px; margin-bottom: 5px;">10 pencils</div> 	<div style="background-color: #ffc107; padding: 2px; margin-bottom: 5px;">$10 \times 4 = 40$ pencils</div> 					
<div style="background-color: #e91e63; color: white; padding: 2px; margin-bottom: 5px;">$(3 \times 4) \times 2 = 24$</div> 			<div style="background-color: #ffc107; padding: 2px; margin-bottom: 5px;">75g</div> 	<div style="background-color: #ffc107; padding: 2px; margin-bottom: 5px;">$75g \times 2 = 150g$</div> 				
Short Division with Exact Answers								
<p>There are 69 tennis balls packed in tubes of 3.</p> <p>There are 23 tubes altogether.</p>		<div style="background-color: #0072bc; color: white; padding: 5px; margin-bottom: 10px;">$69 \div 3 = 23$</div> <table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse;"> <tr> <td style="padding: 5px;"></td> <td style="text-align: right; padding: 5px;">23</td> </tr> <tr> <td style="padding: 5px;">3</td> <td style="border-left: 1px solid black; padding: 5px;">69</td> </tr> </table>		23	3	69		
	23							
3	69							
								

Vocabulary and home learning

Check with your class teacher to find out which division method your child is currently learning.

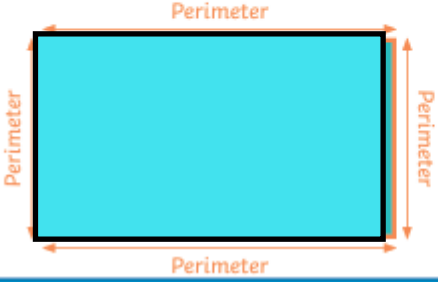

Practise short division using 2-digit numbers.

and bar modelling to show equal groups

Try and work a division out using short division and also draw it as a bar model.

Make up some word problems. Can you challenge a classmate?

Block 2 Perimeter

Area and Perimeter									
Keywords	Area and Perimeter								
area	Area is the amount of space inside a 2D shape.								
perimeter	Perimeter is the total distance around the outside of a 2D shape.								
centimetres									
metres									
squares									
distance									
millimetres									
kilometres									
length		<table border="1"> <thead> <tr> <th colspan="2">Units of Measure for Perimeter</th> </tr> </thead> <tbody> <tr> <td>km</td> <td>1 kilometre = 1000 metres</td> </tr> <tr> <td>m</td> <td>1 metre = 100 centimetres</td> </tr> <tr> <td>cm</td> <td>1 centimetre = 10 millimetres</td> </tr> </tbody> </table>	Units of Measure for Perimeter		km	1 kilometre = 1000 metres	m	1 metre = 100 centimetres	cm
Units of Measure for Perimeter									
km	1 kilometre = 1000 metres								
m	1 metre = 100 centimetres								
cm	1 centimetre = 10 millimetres								
width	<table border="1"> <thead> <tr> <th colspan="2">Rectilinear Figures</th> </tr> </thead> <tbody> <tr> <td colspan="2">A rectilinear figure is a 2D shape whose sides all meet at right angles (90°).</td> </tr> <tr> <td colspan="2">  </td> </tr> </tbody> </table>	Rectilinear Figures		A rectilinear figure is a 2D shape whose sides all meet at right angles (90°).					
Rectilinear Figures									
A rectilinear figure is a 2D shape whose sides all meet at right angles (90°).									
									
rectilinear									
right angle									
									

Encourage Investigation
wonder how many different Shapes I can draw with a perimeter of 32cm?

Vocabulary and home learning

Practise drawing shapes and finding the perimeter measurement of the shape on squared paper.

Practise vocabulary can your child explain what a key word means or draw an example?

Block 3 Fractions

Fractions		Knowledge Organiser																									
Key Vocabulary		Fraction Families

Fractions		Knowledge Organiser	
Adding Fractions		Subtracting fractions	
<p>Fractions can be added when the denominators are the same.</p> <p>$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$</p>		<p>Fractions can be subtracted when the denominators are the same.</p> <p>$\frac{3}{4} - \frac{2}{4} = \frac{1}{4}$</p>	
<p>$\frac{2}{8} + \frac{4}{8} + \frac{1}{8} = \frac{7}{8}$</p>		<p>$\frac{8}{6} - \frac{5}{6} = \frac{3}{6}$</p>	
<p>$\frac{4}{5} + \frac{2}{5} = \frac{6}{5}$ or $1\frac{1}{5}$</p>			

Summer Block 1 Decimals B

Decimals		Knowledge Organiser	
Key Vocabulary	Tenths and Hundredths		
tenths		Fraction and Decimal Equivalents	
hundredths			= $\frac{1}{2}$ = 0.5
decimal tenths	Tenth and Hundredth Decimal Equivalents		= $\frac{1}{4}$ = 0.25
decimal hundredths			= $\frac{3}{4}$ = 0.75
decimal equivalents			= $\frac{1}{10}$ = 0.1
part-whole model			
rounding			
decimal point			
place value			

Vocabulary and home learning

- Practise counting in tenths and hundredths using money.
- Show decimals using a blank 100 square. Each row = 1 tenth.
- Can you shade these decimals? $\frac{4}{10}$ $\frac{22}{100}$, $\frac{5}{100}$
- Practise making decimals using the decimal place value grid and some Cheerios as place value counters.

Summer Block 2 Money

Practise counting coins and giving change. Use skills such as rounding and estimating when out shopping in the supermarkets.

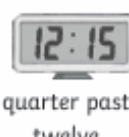

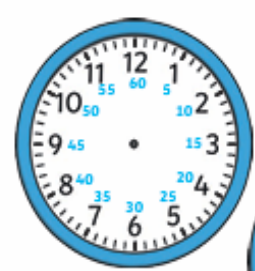

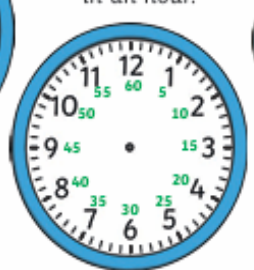

Find the difference between an expensive and cheap brand of the same item.

Money		Knowledge Organiser							
Key Vocabulary amount change combinations estimate decimal pence penny pounds round value convert	UK Coins								
									
	£0.01	£0.02	£0.05	£0.10	£0.20	£0.50	£1.00	£2.00	
	one penny coin	two pence coin	five pence coin	ten pence coin	twenty pence coin	fifty pence coin	one pound coin	two pound coin	
	UK Notes								
									
	£5 five pound note		£10 ten pound note		£20 twenty pound note		£50 fifty pound note		
	Pounds and Pence								
					463 = £4.63				
	£3 and 25 pence		£3.25		£52 and 13 pence		£52.13		
				705p = £7.05					
				92p = £0.92					

Money		Knowledge Organiser	
Ordering Money			
We can compare or order amounts by changing all amounts to either pounds or pence.			
$£4.82$ <input type="text"/> $428p$ $£4.82 = 482p$ $482p > 428p$ $£4.82 > 428p$	Order in ascending order: $516p$ $156p$ $£1.65$ $£6.51$ $£1.65 = 165p$ and $£6.51 = 651p$ 156p, £1.65, 516p, £6.51		
Estimating Money			
 <p>That's about £8.</p> 	 <p>That's about £4.</p> 		
We can use estimates when calculating.			
  <p>They are about £3 and £7 so will be about £10 in total.</p>	   <p>They are about £4 and £3 so will be about £7 in total. I will have about £3 left.</p>		

Summer Block 3 Time

Practise drawing time lines to solve time problems . Harry watched a film that lasted 90 minutes. If he started watching it at 7:15, when did it finish?

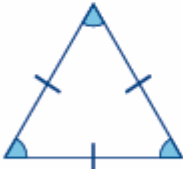

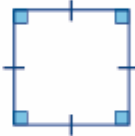

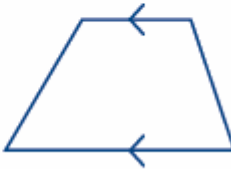

Time	Knowledge Organiser
Key Vocabulary	Analogue and Digital Clocks
12-hour time	  <p>twelve o'clock</p>   <p>quarter past twelve</p>   <p>half past twelve</p>   <p>quarter to one</p>

Make shapes flashcards to test knowledge.

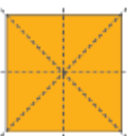

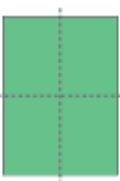

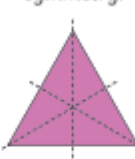

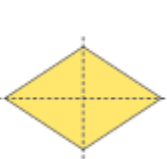

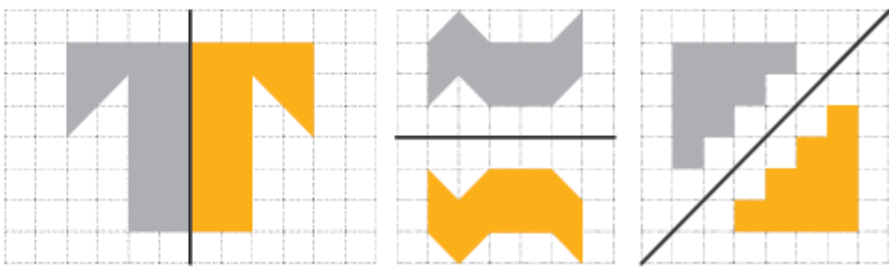

Make shapes using paper straws, plasticine or card. Play guess my shape describing the properties (features of the shapes).

Summer Block 4 Shape

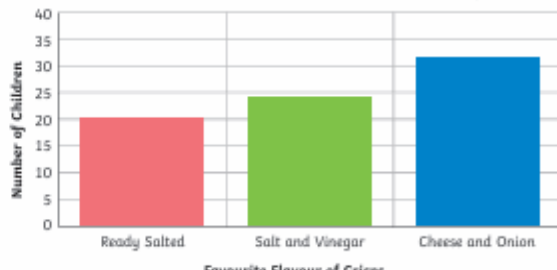

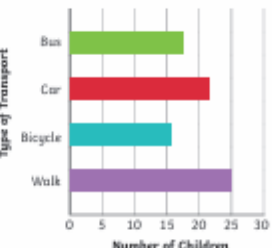

Properties of Shape		Knowledge Organiser	
Key Vocabulary	Triangles	Quadrilaterals	
angle	<p>Triangles have 3 sides and 3 vertices. The total of the angles in a triangle is 180°.</p>  <p>An equilateral triangle is a regular polygon. It has sides of equal length and each angle is 60°.</p>	<p>A quadrilateral is a polygon with four sides.</p>  	
right angle		<p>A square has four sides of equal length and four right angles (90°). A square is also a rectangle, a rhombus and a parallelogram.</p> <p>A rectangle has two pairs of parallel, equal sides and four right angles. A rectangle is also a parallelogram.</p>	
acute		<p>A parallelogram has two pairs of parallel, equal sides and opposite equal angles.</p>  	
obtuse		<p>A rhombus has four sides of equal length and opposite equal angles. A rhombus is also a parallelogram.</p>	
horizontal	<p>An isosceles triangle has two sides of equal length and two angles of equal size.</p> 	<p>A trapezium only has one pair of opposite parallel sides.</p> 	
vertical	<p>A right-angled triangle always has one 90° angle.</p> <p>It can be isosceles or scalene.</p> 	<p>A kite has two pairs of adjacent equal sides and one pair of opposite equal angles.</p> 	
diagonal	<p>A scalene triangle has no equal sides or angles.</p> 		
parallel			

Properties of Shape

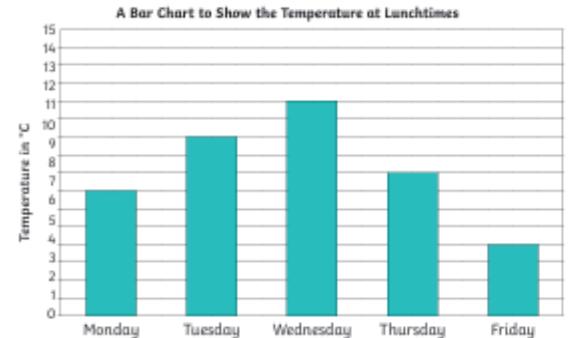

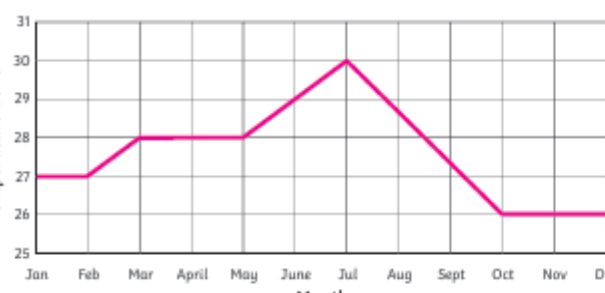

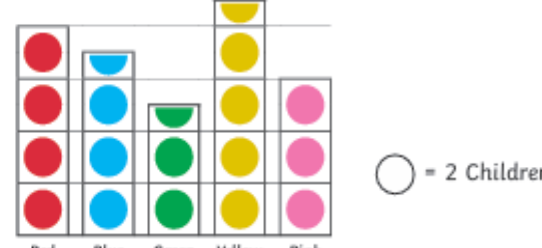

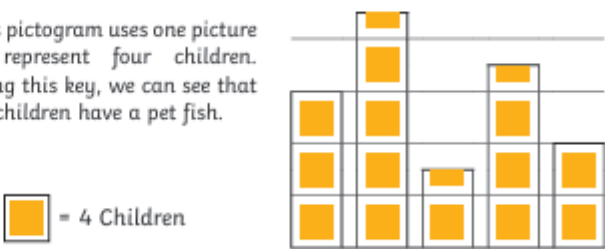

Knowledge Organiser

Angles	Lines of Symmetry				
<p>An angle is created when two straight lines meet at a point or intersect.</p> <p>Right angle The intersection of perpendicular lines creates a right angle.</p>  <p>Acute angle Any angle measuring more than 0 degrees and less than 90 degrees is acute.</p>  <p>Obtuse angle Any angle measuring more than 90 degrees but less than 180 degrees is obtuse.</p> 	<p>Lines of symmetry may be horizontal, vertical or diagonal. Some 2D shapes will have no lines of symmetry and some 2D shapes will have multiple lines of symmetry.</p> <p>A square has four lines of symmetry.</p>  <p>A rectangle has two lines of symmetry.</p>  <p>An equilateral triangle has three lines of symmetry.</p>  <p>An isosceles triangle has one line of symmetry.</p>  <p>A rhombus has two lines of symmetry.</p> 				
<p>Symmetric Figures</p> <p>Patterns and shapes can be reflected in a mirror line. Mirror lines can be vertical, horizontal or diagonal.</p> 					

Summer Block 5 Statistics

Statistics		Knowledge Organiser
Key Vocabulary	Discrete and Continuous Data	Bar Charts
bar chart	Data that is counted in whole numbers is discrete. In discrete data , values between whole numbers cannot be counted.	A bar chart has a horizontal axis and a vertical axis. Bars are used to show the data of each category. There must be a gap between each bar.
pictogram	Data that is measured and therefore can take on infinite values is continuous. In continuous data , values between whole numbers can be counted.	The scale of the bar chart is based on the range of data.
frequency table		The scale on this bar chart counts in fives.
tally chart		
discrete data	Frequency Tables	
continuous data	Tally marks are used to help count things. Each vertical line represents one unit. The fifth tally mark goes down across the first four to make it easier to count.	The bars are horizontal on this bar chart.
time graph	The frequency column is completed after all the data has been collected.	
sum		Two sets of data are shown on this stacked bar chart.
difference		
comparison		
interpret		
		

Eye Colour	Tally	Frequency
brown	###	6
blue	###	8
green		3
grey		4
hazel	###	5

Statistics		Knowledge Organiser
Time Graphs		Pictograms
Time graphs show how data changes over time.		Pictograms use symbols or pictures to represent data.
A Bar Chart to Show the Temperature at Lunchtimes		This pictogram uses one symbol to represent two children.
		Using this key, we can see that seven children prefer the colour blue.
A Line Graph to Show the Average Monthly Temperature in the Borneo Rainforest		Class 10's Favourite Colours
		
		Class 10's Pets
		This pictogram uses one picture to represent four children. Using this key, we can see that six children have a pet fish.
		

Summer Block 5 Position and Direction

Position and Direction		Knowledge Organiser	
Key Vocabulary		Position in the First Quadrant	
coordinate		Coordinates are a useful way to locate a position on a map or grid.	
quadrant		The numbers across the horizontal line of the grid are on the x-axis .	
x-axis		The numbers on the vertical line of the grid are on the y-axis .	
y-axis		We always read or write the number on the x-axis before the y-axis .	
translation		The x and y position are written in brackets with a comma. The coordinate of the blue spot is (2, 3) .	
vertex	<p>To help you remember which point to read or write first, simply remember to move 'along the corridor and up the stairs'.</p> <p>In other words, move on the x-axis and then move on the y-axis.</p>		
vertices

Position and Direction		Knowledge Organiser	
Translation		Plotting 2D Shapes	
<p>In maths, translation means moving an object on a grid. The object is moved without changing the size, turning or reflecting it.</p> <p>When translating an object on a grid, it can move up or down, left or right.</p>		<p>Each vertex (corner) of a 2D polygon can be represented as a coordinate on a 2D grid.</p>

Multiplication Square

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

- Daily tables practise is crucial in year 4.
- Use Purple Mash tables test environment for speed testing.
- Skip count in multiples—tackle a table at a time.
- Play tables bingo
- Build a fact family -

Ten Thousands, Thousands, Hundreds, Ten and Ones Place Value Grid

TTk Ten Thousands 10 000	Tk Thousands 1000	H Hundreds 100	T Tens 10	O Ones 1

Practise making numbers on place value grids.

“ Make me a 4 –digit number that is even– can you read it out to me?”

Make me a 4-digit number where the ones digit is less than the hundreds digit. Can you read it to me?

Can you guess my 4-digit number. The digits total 9 when added together?

Decimal place value grid

Practise writing money amounts such as £1.09

Tens	Ones	●	Tenths	Hundredths
		●		

Real Life Maths!

Encourage your child to see Maths as skills essential to life, not just a lesson. Look at all these examples!

Real Life Maths
Involve your child in as many problem-solving activities as possible.

shopping

counting, estimating, rounding, budgeting, percentages giving change, adding, subtracting, multiplying, dividing, comparing,

Playing games

counting, estimating comparing, subitising, sequencing

Planning an outing

estimating, rounding, budgeting, timing using timetables, distance, journey time, dividing adding subtracting dividing multiplying, working out change and cost.

Cooking a meal

Proportion and ratio, measuring, estimating

timing, ordering dividing multiplying adding.

Using a TV guide

Reading tables, data handling/ interpretation, time estimation, rounding, telling the time.

Number Formation Handwriting Practice
